Next Generation LED Lamps are Even Brighter, More Efficient

White LED technology steps into the future with the latest addition to Hella marine's DuraLed family. Upgraded to supply even greater levels of light intensity and energy efficiency on board, the innovative DuraLed Plus provides an impressive output of over 600 Candela with a very wide and uniform distribution.

An extremely powerful light source, the versatile DuraLed Plus is a reliable alternative to incandescent and fluorescent options. The dependable lamp is designed for engine rooms, storage lockers, tender lighting, anchor wells, wet areas and other heavy-duty interior and exterior applications where safety is a must.

Ignition protected to ISO 8846 and SAE J1171 standards, the power-saving DuraLed Plus employs efficient optics and consumes less than 9W per lamp. Hella marine Multivolt circuitry

ensures consistent illumination and circuit protection from 9-33V DC, even under severe voltage fluctuations. It is also spike and reverse polarity protected.

Featuring a fully-sealed housing, the resilient DuraLed Plus is impact-, shock- and UV-resistant, ensuring an ultra-long service life. IP 67 certified, it's completely waterproof.

Measuring 7" L x 4" W x 1-1/5" D, the low-profile DuraLed Plus from Hella marine offers a simple, surface-mount installation.

New Stereo Brings Outdoor Music Into the Digital Age

With so many music format options available today, boaters, golfers and other outdoor enthusiasts should not be limited with outdated technology. Compatible with MP3 and WMA audio files, the advanced Millenia MR380 Receiver from Prospec Electronics is a state-of-the-art AM/FM/CD stereo with USB, SD and AUX inputs conveniently located on the unit's front.

Designed specifically for use with portable media, the innovative MR380 also provides a versatile PLL tuner with 18 FM and 12 AM station presets. Operating at 4 x 40 watts, it features an ergonomic, ro-

tary-style volume knob, detachable control panel with a sleek, digital display and a line-out for an additional amp.

Built to withstand harsh conditions, the resilient receiver offers electronic shock protection. For further defense against the elements, an optional cover is also available. Simple to mount, the streamlined unit has an installation size of just 7-1/8" W x 2-1/8" H x 6-3/4" D.

The suggested retail price of the modern Millenia MR380 from Prospec Electronics has a suggested retail price of \$149.

Compact Handheld VHF Recognized As Gear of the Year

Packing the most impressive features into a submersible handheld VHF radio, Cobra Marine, a division of Cobra Electronics, offers its MR HH325 VP. The unit was selected as a Practical Sailor 2009 Gear of the Year Editor's Choice Product.

Offering all NOAA weather channels, the MR HH325 VP provides instant access to national all hazards and weather information, 24 hours a day. If threatening weather is approaching, the handheld will sound an audible warning and display a visual alarm, a feature the editors at Practical Sailor appreciated.

Unlike some of the other VHF radios tested, Cobra's MR HH325 VP is submersible to JIS7 standards. With selectable power output of either 1, 3 or 5 watts, the unit also allows both short- and long-range operation.

Practical Sailor was also impressed with the MR HH325 VP's large, illuminated LCD display, which is up to 60% bigger than the competition. The handheld's function keys are illuminated for greater visibility. With the push of a button, owners can lock the function keys to eliminate accidental settings changes.

An external speaker/microphone jack enables the connection of Cobra speaker mic accessories for hip or body worn operation. Unlike other handhelds, the MR HH325 VP comes with plenty of extra equipment, including a 1,500 mAh NiMH rechargeable battery, locking desktop charger, spring-loaded swiveling belt clip and wrist strap.

For more information on Practical Sailor, please visit www.practical-sailor.com.

Cruise the Best Harbors in the World

Greenport, Shelter Island, Dering Harbor, West Neck Harbor, Coecles Harbor, Sag Harbor, Three Mile Harbor, Montauk Point, Block Island, Fisher's Island, Plum Gut, The Race, Connecticut River, Mystic Seaport, and Newport are a few of the many destinations that are less than a day away from a slip at Brick Cove Marina.

The slips in our well-protected cove have access to the deep water of Southold Bay, Great Peconic Bay, Gardiner's Bay and Long Island Sound. The marina and its approaches offer 5½ ft. of water at low tide with a well-marked channel. Floating docks with wide slip spacing, long fingers and utility posts provide safe and easy berthing.

While in your homeport, enjoy the pool and tennis courts, 800 feet of Southold Bay beach front, a grassy picnic area, heads and showers as well as free wireless internet. All of this and a skilled service department that can provide as much or as little service as you require, make for a satisfying boating experience.

Located in the heart of the North Fork wine country, just a few miles from historic Greenport, Brick Cove Marina is a hidden gem. Come experience our family friendly service.

We offer a 10% early pay discount to the customers that stay with us year round. Check out our website at www.brickcove.com and give Diane a call at 631.477.0830 for more information.

NEW PRODUCTS

New Compact Battery Switches Save Space Onboard

Bridges are often overcrowded with numerous controls, displays and electronics. Saving precious dashboard space, Perko offers a new line of compact, patented Battery Switches.

Ignition protected, these streamlined Battery Switches require 1/3 less area to mount than other switches and have the same footprint as the larger Perko models. Available in on/off disconnect and selector versions, they measure just 4-3/4" in diameter and have a depth of only 1-7/8".

With locking and non-locking models, the advanced Battery Switches provide new, smooth rotary action and popular, easy-to-identify 90° position rotation. Rated 315 continuous and 450 in-

termittent, they are designed for use with 12, 24 and 32V marine electrical systems.

Simple to install, these sleek, new Battery Switches from Perko have a suggested retail price under \$50.

Perko has manufactured superior marine lights, hardware and other accessories for over 100 years. To meet upcoming EPA regulations, the company also offers state-of-the-art evaporative emissions control systems, including canisters, fuel system valves, fills, vents and caps.
